

# Robria T. Smith

Senior Financial Analyst | Financial Planning & Analysis (FP&A) | Business Partnering

New Orleans, LA | Robriagreen@yahoo.com | 504-982-3744 |

**SUMMARY:** Results-driven Financial Analyst with experience supporting FP&A, budgeting, forecasting, and financial reporting across healthcare and insurance organizations. Proven ability to manage multi-million-dollar cost centers, perform variance analysis, support month-end closing, and deliver actionable financial insights to business leaders. Skilled in identifying cost drivers, improving expense visibility, and supporting data-driven decision-making. Combines strong financial acumen with technical capabilities in Excel, SQL, and Python to enhance reporting accuracy and streamline financial processes.

## PROFESSIONAL EXPERIENCE

---

**Mutual of Omaha Insurance Company, Omaha NE**

**June 2023 – Present**

*Sr. Financial Analyst - Rotational experience across Product Accounting, Business Intelligence, and Internal Audit*

### ***Product Accounting***

- Supported month-end close and financial reporting processes through journal entry preparation, account analysis, and reconciliation of in-force policy data.
- Analyzed policy activity and financial data to support quarterly adjustments for converted policies, ensuring accurate financial representation and alignment with reporting requirements.
- Performed variance analysis on key financial metrics (e.g., premiums, commissions, policy counts), identifying discrepancies and supporting resolution to maintain reporting integrity.
- Owned reconciliation processes for third-party administrator data (Maxon), validating financial results and ensuring alignment between operational data and financial reporting.
- Partnered with internal stakeholders to investigate and resolve reporting variances, improving transparency and strengthening financial controls.
- Automated reconciliation and reporting processes using Power Query, reducing manual effort and improving efficiency in recurring financial workflows.

### ***Business Intelligence***

- Supported financial reporting and forecasting processes by maintaining and enhancing data pipelines used for claims and reserve reporting.
- Translated legacy SAS-based reporting logic into Python workflows, improving efficiency and scalability of financial data processes used by finance teams.
- Performed data validation and reconciliation between legacy and new reporting systems to ensure accuracy of financial outputs during system transition.
- Analyzed claims data, including death claims and reserves, to support reporting accuracy and provide insights into financial activity and trends.
- Processed and reviewed claim reserve data across multiple entities, applying business rules to ensure proper classification and financial treatment.
- Supported financial reporting by preparing journal entries related to claim reserve activity and ensuring alignment with accounting requirements.
- Developed automation to streamline recurring reporting processes, improving timeliness and consistency of financial data delivery.

### ***Internal Audit***

- Evaluated financial processes and internal controls to ensure accuracy of financial reporting and compliance with regulatory and internal standards.
- Conducted audit testing on premium tax reporting, validating calculations, deductions, and state-level reporting accuracy.
- Assessed investment-related controls through bond audits, evaluating monitoring processes and governance practices.
- Reconciled financial data across systems to verify completeness and accuracy of reported investment activity.

- Independently analyzed large expense datasets to identify trends, policy violations, and control gaps within travel and expense processes.
- Delivered insights and recommendations to business stakeholders, supporting process improvements and strengthening financial oversight.

## **Baystate Health Network, Springfield MA**

**November 2022 – June 2023**

### ***IT Finance Liaison / Financial Analyst (FP&A)***

- Managed financial planning and analysis for four IT cost centers with budgets ranging from \$5M–\$10M, supporting budgeting, forecasting, and expense management.
- Performed monthly budget-to-actual analysis, identifying key variances, cost drivers, and emerging financial risks impacting departmental budgets.
- Developed monthly spend forecasts using historical trends, contract analysis, and current-year activity to project future expenses and identify potential budget overruns.
- Delivered financial insights to IT leadership through executive-level reporting, including PowerPoint presentations summarizing forecast vs. budget performance and risk areas.
- Partnered directly with cost center owners to review financial performance, explain variances, and support proactive decision-making to stay within budget targets.
- Supported month-end close through expense reviews and accrual analysis, ensuring accurate expense recognition and alignment with accounting periods.
- Reviewed vendor billing activity, including annualized contracts, to ensure appropriate expense timing and prevent misstatement of monthly financial results.
- Managed vendor contracts within Meditract, ensuring accurate tracking of financial commitments and alignment with approved budgets.
- Validated invoices against contractual terms and financial records, identifying discrepancies and preventing overpayments.
- Strengthened financial controls by improving visibility into vendor spending and ensuring compliance with contract terms and budget expectations.

## **TECHNICAL SKILLS**

---

**Tools:** Advanced Excel (Pivot Tables, XLOOKUP/VLOOKUP, Data Models), Power Query, PowerPoint

**Data & Systems:** SQL, Python (Reporting Automation), Snowflake, Teradata, Tableau, Lawson BI, PeopleSoft, Optro (formerly known as AuditBoard), Meditract

## **EDUCATION**

---
